Ammar Arab –Frontend Developer

Amman, Jordan | +962788482930 | oammar@outlook.sa| GitHub | LinkedIn

Frontend Developer with about 1 year of experience building responsive web and mobile apps using Next.js and React Native. Skilled in performance optimization, and hardware integrations (Bluetooth/Printing).
I care about writing maintainable code and understand backend basics to work smoothly with full-stack teams.

Skills

- Web & Mobile:
- Next.js | React Native
- JavaScript | TypeScript
- HTML | CSS |Tailwind

- Native & Backend:
- Native Modules | Java
- SQL Server | SQLite
- JWT | RESTful APIs

- Tools & Performance:
- Git | GitHub | JSON
- BT | Printing ZPL/CPCL
- Redux Toolkit| SEO

- Core Competencies:
- Agile | Problem-Solving
- Time Management
- Teamwork | Adaptability

Experience

Al Dayrawi Group – Junior Software Engineer ***Mar 2025 – Present***

- Developed a B2B portal with Redux, custom proxy API layer, and interactive map integration.
- Created a 30+ screen sales app (React Native CLI) with MVVM pattern and ESC/POS receipt printing.
- Improved barcode scan performance by ~98% via reselect and Map-based Redux selector refactoring.
- Engineered a native module in Java for thermal printing, saving printer replacement costs across 12 branches.
- Resolved a critical production bug that blocked saving a 1,000-item inventory count, preventing data loss.

A Plus Academy – Full Stack Developer Intern ***Nov 2023 – Apr 2025***

- Worked within a development team to develop an HR backend through system analysis and ERD modeling.

Projects

Volunteering Platform (*View Live*) (*short video*) - *Letter of Appreciation* ***Oct 2025 – Present***

A self-built, production-ready platform with clean architecture, role-based access (Admin & Volunteer), dedicated dashboards for managing activities, posts, profiles, and applications, along with search, filtering, pagination, sorting, Excel export, image compression, transactional emails, and secure password hashing.

PDA Inventory App

Production warehouse app with barcode scanning, UOM conversion, stock count, and transfers. Replaced 10 sequential API calls with parallel fetching and SQLite caching — reducing load time from ~25s to ~6s.

Other Projects · Freelance & Side Work.

Full-stack and frontend websites built over the past 2 years, using React, Next, TS, C#, ASP.NET Core, and SQL.
