Ammar Arab – Next.js Developer

Amman, Jordan | +962788482930 | contact@ammararab.com| Portfolio | GitHub | LinkedIn

Next.js Developer with 1+ year of experience building production-ready web applications. Skilled in React, Next.js, TypeScript, and Redux. Experienced in scalable frontend systems, implementing authentication, real-time features, and AI integrations. Passionate about clean architecture, performance, and shipping solutions.

Skills

- Frontend Development:	**- State & Data Management:**	**- Backend | Infrastructure:**	**- Core Competencies:**
- Next.js | React.js | SCSS	- Redux | Context API	- NextAuth | JWT | Inngest	- Clean Architecture | DDD
- JavaScript | TypeScript	- Prisma ORM | RESTful APIs	- Web Push API | Sentry	- Agile | Problem-Solving
- HTML | CSS | Tailwind	- SQL Server | PostgreSQL	- Git | GitHub | Vercel	- Time Management

Experience

Al Dayrawi Group – Junior Software Engineer ***Mar 2025 – Present***

- Built a B2B portal with Redux, a Next.js proxy API layer (CORS solution), and an interactive map integration.
- Built modules and features for inventory app (SQLite, Redux), improving barcode scan performance by 98%.
- Developed a native Android printing solution that saved printer replacement costs across 12 branches.
- Coordinated with external dev team on delivery system, handled QA, and ensured business alignment.

A Plus Academy – Full Stack Developer Intern ***Nov 2023 – Apr 2025***

- Worked within a development team to develop an HR backend through system analysis and ERD modeling.

Projects

Volunteering Platform (*View Live*) (*short video*) - *Letter of Appreciation* ***Oct 2025 – Present***

Technologies: Next.js | TypeScript | PostgreSQL| Inngest | Puppeteer | Cloudflare | Resend | Grok AI | Sentry | Vercel

- Two-sided platform: volunteer, admin, two-tier role-based access control, and granular permissions per role.
- Authentication and authorization: OTP verification, JWT versioning, and Bearer support alongside session.
- Activity completion triggers an Inngest background job, renders a certificate from HTML to PNG, persists to Cloudflare and the database, then delivers emails and push notifications through a custom 9-type notification engine, Web Push, and transactional email, with a service worker that fires when the browser is closed.
- User, notification, and email management. Content system with posts, magazines, and spotlights. Search, filtering, sorting, pagination, and Excel export. SEO and Google Search Console integrated.
- AI chatbot with streaming responses, model fallback, and per-IP rate limiting. GPS map integration. Sentry across server, client, and edge. Google Analytics 4. Clean Architecture and Domain-Driven Design throughout.

Other Projects · Freelance & Side Work.

Full-stack and frontend websites built over the past 2 years, using React, Next, TS, C#, ASP.NET Core, and SQL.
